# HOME CONNECTIVITY

Connect your Smart TV, game console for online gaming, notebooks and just about anything with a Wi-fi pulse to the internet or to each other.

## HOME NETWORKS CONNECT IN TWO WAYS.

- 01 **Wired network:** Connects devices to each other and the internet using Ethernet cables.
- 02 **Wireless network:** Commonly known as Wi-Fi, this connects devices to each other and the Internet without using cables.

### HOME NETWORK TIP

A gateway is a nifty device that combines a router and modem into one complete package.

## WHAT YOU NEED TO GET STARTED

- A** **Internet subscription:** ADSL or Fibre through an ISP of your choice.
- R** **Router:** A hub that connects all of your devices to each other. Recommended for fibre.
- M** **Modem / Router:** A device that connects your router to the internet. Recommended for ADSL.
- RE** **Range Extender:** This device helps extend your wireless reach where your modem/router can't reach in the office.

## WHAT CAN YOU DO?

- ➔ **Stream movies, series and videos** on multiple devices.
- ➔ **Multiplayer LAN gaming** and game streaming.
- ➔ **Share videos, music and other files**
- ➔ **Access printers, scanners and other office hardware** from multiples devices.
- ➔ **Remotely control** your home lighting, climate control security system and more.
