

Superspan Gutters has been in operation, in Pietermaritzburg and the Natal midlands, since 1972.

We are a Hulamin approved Gutter System Specialist. Our aluminium gutters are backed and guaranteed by Hulamin for 15 years against any paint defects ie peeling flaking etc.

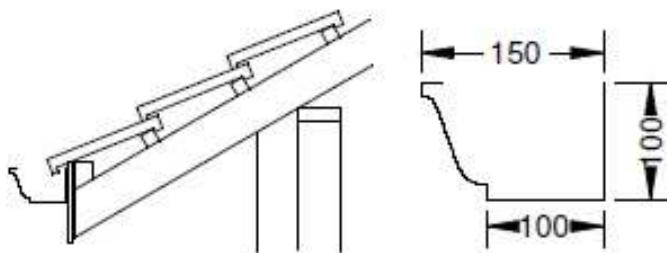

Superspan supply and install continuous seamless domestic and industrial OG (Original Gothic) gutter aswell as an industrial square gutter in a variety of colours and sizes. The gutters are roll formed to any required length on site or for collection from our workshop. The gutters are made from epoxy coated aluminium from Hulamin in Pietermaritzburg. All fixing brackets, stopends miters outlets and downpipes etc. are also supplied by us to match the gutters.

All rollformed gutters are of standard dimensions as indicated.

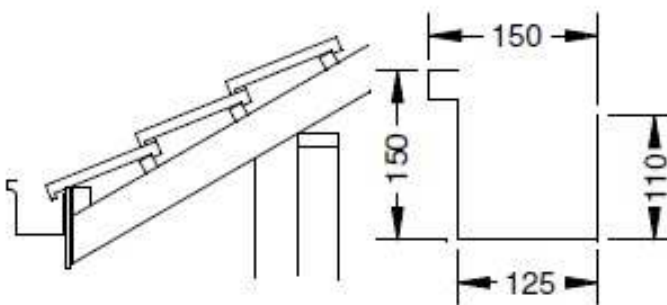

Domestic OG gutter

An attractive profile for domestic use, or any application using the domestic size downpipe. This gutter can be fitted on a steel galvanised bracket, to enable easier cleaning or the hidden internal aluminium bracket.

Industrial OG gutter

An attractive profile for domestic use and is inkeeping with larger and double story dwellings. This gutter can be fitted on a steel galvanised bracket, to enable easier cleaning or the hidden internal aluminium bracket.

Industrial square gutter

Our unique and attractive profile for larger dwellings aswell as industrial building. This gutter is fitted on a more robust 20x5mm steel galvanised and powder coated bracket with the front being higher than the back to hide the edge of the sheeting and prevent water overshooting it.
